

PROGRAM SPECIFIC GIFTS

Grace Christian School is a faith-infused, academically rich community that fuels each students' potential. Whether students are engaged in a literary discussion, collaborating on a math application project, or engineering a city for the future, the culture and climate at GCS radiates energy and a passion for becoming tomorrow's leaders, thinkers, and innovators.

Alumni, family, and friends of GCS are invited to delegate their gifts to a program they are most passionate about strengthening.

STEM

Our science, technology, engineering, and mathematics programs engage students in a process of inquiry and problem solving in which they develop both knowledge and skills. The purpose of these programs is to encourage and stimulate students' learning by nurturing their sense of wonderment, by developing skill and confidence in investigating their surroundings, and by building a foundation of experience and understanding upon which later learning can be based.

Using a variety of innovative technology from the world of advanced robotics, students can be found developing solutions to open-ended project-based design challenges.

Students design and build their own structures before sharing their creations with others in the online community and printing their 3D designs.

DIGITAL DESIGN & ROBOTICS

ATHLETICS

Extracurricular activities are an important component of the student experience here at Grace Christian School. Athletics provide an opportunity to learn many life lessons and develop qualities, through participation, that will help students reach their potential as future leaders.

PERFORMING ARTS

From our youngest students in Pre-Kindergarten to our oldest in Grade 12, GCS provides opportunities for students to craft and refine their musical talents and participate in drama performances throughout the school year.

VISUAL ARTS

The GCS visual art courses challenge and encourage students to achieve growth in their skills while producing unique and creative works of art. While gaining a greater appreciation for artists' work throughout history, students experiment with new media and design techniques.

INTERNATIONAL STUDIES

Grace Christian School's International Studies program not only supplies our international students with the most intense and individualized English Second Language program on Prince Edward Island, it also enhances their educational experience with cultural integration and spiritual formation that will open doors to Canada and beyond.

STAFF PROFESSIONAL DEVELOPMENT

Each member of the team is committed to professional excellence and seeks to improve their teaching skills through professional development and the implementation of 21st century pedagogy. They are highly respected in their fields of passion and education, presenting at conferences around the world, serving on international and community boards, and mentoring pre-service and new teachers.
