

Senior High Academic Program and Course Guide

Introduction

The senior high school academic program is intended to foster the intellectual, physical, emotional, spiritual, and social growth and development of students. To be successful, the program must have enough flexibility to address the interests and needs of all students as they transition from high school to their first post-secondary destination.

In partnering with parents, our aim is to enhance and enrich the education that students are already engaged in at home and in other aspects of their lives. We provide opportunities in which every student is known, celebrated, and encouraged to discover and develop their innate, God-given gifts in an environment that teaches Christ-centred values.

Academic Standards

All high school courses are university preparatory, and the minimum grade to receive a course credit is 60%. Twenty high school (grade 10-12) credits are required to receive a standard graduation diploma. A myriad of courses are offered, including humanities, mathematics, sciences, visual/performing arts, Christian ethics, ESL, and electives.

Additionally, GCS is an Advanced Placement (AP) certified school, allowing students to write any AP exam and providing select AP courses throughout the year.

Academic Transfer

GCS may grant credit to a student for courses provided by a school in PEI or another province/country. The credit granted shall be for the equivalent course offered by GCS if the course is comparable in content and learning outcomes. Transferred course credits should meet the academic standards of GCS courses. School administration will determine final graduation credit requirements in certain situations.

Students who transfer to GCS in grade 11 are required to attain 14 GCS course credits; these credits must include 2 Christian Ethics, 2 English, 2 Math, 2 Science, and 2 Social Studies credits. Five courses must be at the grade 12 credit level.

Students who transfer to GCS in grade 12 are required to attain 7 GCS course credits; these credits must include 1 Christian Ethics, 1 English, 1 Math, 1 Science, and 1 Social Studies credit, 5 of which must be at the grade 12 credit level.

Virtutis • Fides • Scientia

GRACE CHRISTIAN SCHOOL
est. 1980

Academic Certificates

Senior high school students who attend GCS for less than one year or only for grade 12 and have emergent level English language proficiency are eligible for the GCS Grade 12 ESL certificate based upon academic performance at GCS.

Senior High Awards

Senior High students in grades 10-11 are eligible for various awards including:

- | | |
|--------------------------------------|-------------------------------------|
| • Ambassador Award | • Pamela Thompson Mathematics Award |
| • Laura Mattson Sports Award | • Jonathan Award |
| • Dave Wessel Science Award | • Paul Award |
| • Neil Thompson Social Studies Award | • Timothy Award |
| • Anne Laird School Spirit Award | |

Graduation Awards

Senior High students in grades 12 are eligible for various awards including:

- | | |
|---|----------------------------------|
| • Ambassador Award | • Jason Biech Legacy Award |
| • Governor General's Award | • Anne Laird School Spirit Award |
| • Laura Mattson Sports Award | • Landmark Valuation Award |
| • Dave Wessel Science Award | • Myrna O'Connor Bursary |
| • Neil Thompson Social Studies Award | • Heart of Service Bursary |
| • Dr. Susanne Huizing Scholarship for English Language Learners | • Faithful Steward Bursary |
| • Pamela Thompson Mathematics Award | • Biovectra Award |
| | • Pastors' Bible Award |
| | • Roadbuilders Award |
| | • Duke of Edinburgh Gold Award |

GCS Graduation Requirements

- 20 total high school credits (including five Grade 12 credits):
 - 3 English credits
 - 2 Math credits
 - 2 Science credits
 - 2 Social Studies credits
 - 3 Christian Ethics credits
 - 1 Creativity/Innovation credit
 - 1 Career Education and Opportunities credit
 - 1 Physical Education credit

A grade 12 ESL credit is required for students who have not attained a sufficient IELTS score prior to the beginning of their grade 12 year.

Virtutis · Fides · Scientia

GRACE CHRISTIAN SCHOOL
est. 1980

Standard Graduation Diplomas

Standard GCS Diploma

Students who meet the GCS graduation requirements receive the standard GCS diploma.

Standard GCS Diploma with Honours

Students who meet the GCS graduation requirements and achieve an overall average of no less than 80% receive a GCS Diploma with Honours. To be eligible, students must take a minimum of seven courses in their grade 12 year (with no major course accommodations or modifications), excluding CWS601A, CWS602A, and all External Credit courses.

Standard GCS Diploma with Honours with Distinction

Students who meet the GCS graduation requirements and achieve an overall average of no less than 90% receive a GCS Diploma with Honours with Distinction. To be eligible, students must take a minimum of seven courses in their grade 12 year (with no major course accommodations or modifications), excluding CWS601A, CWS602A, and all External Credit courses; CWS601A/602A also are not included in the overall average calculation.

* To qualify for a diploma with honours or a diploma with honours with distinction, a student must exemplify both the academic and behavioural standards of GCS.

Specialized Graduation Diplomas

Students who meet the GCS graduation requirements in addition to other specific requirements are also eligible to receive one of the following specialized graduation diplomas.

Knights Science Scholar Diploma

Students who meet the following requirements receive the Knights Science Scholar diploma:

- Attend GCS for Grade 10, 11 and 12
- GCS Standard Diploma with Honors with Distinction
- Minimum of 85% average in MAT421A, MAT521A, MAT621S, and MAT611S
- Receive a credit in six of the seven following courses with a minimum average of 85% in each course (BIO521A, BIO621A, CHM521A, CHM621A, PHY521S, PHY621S, and ROB621A).
- Receive a credit in the ISC621A course with a minimum average of 85%.

Virtutis · Fides · Scientia

GRACE CHRISTIAN SCHOOL
est. 1980

Knights Humanities Scholar Diploma

Students who meet following requirements receive the Knights Humanities Scholar diploma.

- *Attend GCS for Grade 10, 11 and 12*
- *GCS Standard Diploma with Honors with Distinction*
- *Minimum of 85% average in ENG421A, ENG521A, and ENG621A*
- *Receive a credit in five of the eight following courses with a minimum average of 90% in each course (PHL621A, WRT521A, GEO421A, LAW521A, POL621A, HIS521A, HIS621A, and ECO621A).*
- *Receive a credit in the ISC621A course with a minimum average of 85%.*

Knights Performance and Visual Arts Specialized Diploma

Students who meet the following requirements receive the Knights Performance and Visual Arts specialized diploma:

- *Attend GCS for Grade 10, 11 and 12*
- *GCS Standard Diploma with Honours*
- *Minimum of 85% average in ENG621A*
- *Receive a credit in four of the seven following courses with a minimum average of 90% in each course (ART401A, WRT521A, DRA521A, MUS621A, ART521A, ART511S, and ART621A).*
- *Develop and implement an extra-curricular performance arts or visual arts activity in both grade 11 and grade 12 (as approved by administration).*
- *Receive a credit in the ISC621A course with a minimum average of 85%.*

Knights Student-Athlete Specialized Diploma

Students who meet the following requirements receive the Knights Student-Athlete specialized diploma:

- *Attend GCS for Grade 10, 11 and 12*
- *GCS Standard Diploma with Honours*
- *Minimum of 85% average in ENG621A*
- *Receive a credit PED401A, HPT421A, HPT521A, and HPT621A with a minimum average of 90% in each course*
- *Participate in two GCS athletics sports (including at least one team sport) as part of the PEISAA in each of grade 10, grade 11, and grade 12*
- *Participate in at least 40 hours of volunteerism in either GCS athletics or community sports (as approved by administration)*
- *Receive a credit in the ISC621A course with a minimum average of 85%.*

Course Coding System

Each unique course code is composed of seven characters, with a course title associated with it.

Example: MAT521A - Foundation of Mathematics 11

Subject	Grade	Category	Credit Value	Program
<i>MAT</i>	<i>5</i>	<i>2</i>	<i>1</i>	<i>A</i>
<i>MAT = Math HIS = History BIO = Biology etc...</i>	<i>4 = Grade 10 5 = Grade 11 6 = Grade 12 7 = Grade 10/11 8 = Grade 11/12</i>	<i>0 = Open 1 = Advanced 2 = Academic</i>	<i>1 = 1 credit 2 = 2 credits</i>	<i>A-D = English S = AP T = Ext. Credit</i>

As such, MAT521A is a Grade 11 academic math course, taught in English, worth one credit.

Course Descriptions

Advanced Placement – Capstone Diploma Program

AP Capstone is a diploma program from College Board based on two yearlong AP courses: AP Seminar and AP Research. Rather than teaching subject-specific content, these courses develop students' skills in research, analysis, evidence-based arguments, collaboration, writing, and presenting. Students who complete the two-year program can earn one of two different AP Capstone awards, which are valued by colleges across the United States and around the world. To attain the AP Capstone diploma, students must earn scores of 3 or higher in AP Seminar and in AP Research, in addition to earning scores of 3 or higher on four additional AP exams.

SEM521S – AP Seminar

This course is an interdisciplinary course that encourages students to demonstrate critical thinking, collaboration, and academic research skills on topics of the student's choosing. Students will develop and practice the skills in research, collaboration, and communication that they will need in any academic discipline. They will investigate

topics in a variety of subject areas, write research-based essays, and design and give presentations both individually and as part of a team.

RES621A – AP Research

This course is an interdisciplinary course that encourages students to demonstrate critical thinking and academic research skills on topics of the student's choosing. Students will build on what was learned in AP Seminar to deeply explore an academic topic, problem, or issue of individual interest. Through this exploration, they will design, plan, and conduct a year-long research based investigation to address a research question.

English

ENG421A - World Literature - Grade 10

This course presents a survey of World Literature from a Christian perspective. You will be exploring and identifying literary terms and different forms of literature from each culture as you critique universal themes. You will read and respond to literature in a variety of ways, as you analyze and create responses you will build your reading comprehension and writing skills as well. Selected pieces of literature introduce different worldviews, aid in the development of critical thinking skills and observe the themes of racism, bias and universal commonalities. Elements of short story and poetry will be reinforced. Vocabulary enhancement as well as grammar, usage, and mechanics will be reviewed. Independent Reading Projects (IRPs) will allow you will discover favourite authors and genres.

ENG521A - North American Literature - Grade 11

This course studies the ideas of national identity and reality as shown through period literature. Students will survey American and Canadian literature, identifying traits of each period and contrasting themes, topics, and opinions inherent in each piece. As well, students will be expected to analyze and contrast American and Canadian pieces and formulate observations regarding national identity based on the literature read.

ENG621A - British Literature - Grade 12

This course is focused on the British works that hold literary or historical value. These are works that are important because they have not only shaped literature that followed, but also have become intrinsic parts of English-speaking culture. Students will be expected to critically analyze the pieces, as well as synthesize and draw relationships between the piece and other literary or historical events to identify larger ideals behind the writing and the writer through written and oral assessments.

ENG621S - British Literature AP (Advanced Placement) - Grade 12

Virtutis · Fides · Scientia

GRACE CHRISTIAN SCHOOL
est. 1980

This course has been audited and approved by the College Board as an AP Course, and is designed in a way to help students succeed on their AP Language exams. Students in this introductory college-level course read and carefully analyze a broad range of fiction prose, poetry, and songs as they build their rhetorical awareness regarding how literature deals with societal issues. Students will learn close reading skills that will help them identify information or ideas of importance, and will improve writing skills through frequent practice. Students will read expository, descriptive, analytical, personal, and argumentative pieces, identifying the opinion and purpose that each author had in writing, and carefully interpreting meaning using skills such as social historical context, interpretation of symbolism, and identification of tone and mood in writing.

Prerequisite: Course enrollment based on high standing in ENG421A and ENG521A, in addition to teacher/administration approval.

English As A Second Language

ESL701A/B - English as a Second Language 1

ESL701A - This course introduces the English language and helps students adjust to their new cultural environment. Students will use foundational English language skills in listening, speaking, reading, and writing for everyday and essential academic purposes; use basic English language structures and phonics, learn spelling patterns, and simple sentence patterns in short conversations; read short adapted texts; and write phrases and short sentences. The course also provides students with survival knowledge and the skills they need to begin to adapt to their new lives in Canada.

Prerequisite: GCS English language assessment.

ESL701B - This course expands students' listening, speaking, reading, and writing skills in English for everyday and academic purposes. Students will participate in conversations in structured situations on a variety of familiar and new topics; link English sentences to compose paragraphs; read a variety of texts designed or adapted for English language learners; and expand their knowledge of English grammatical structures, spelling patterns and sentence structures. The course also supports students' continuing adaptation to western school systems by expanding their cultural knowledge of their new province and country.

Prerequisite: English as a Second Language - Level 1 or equivalent

ESL701C - English as a Second Language 2

This course extends students' skills in listening, speaking, reading, and writing in English for a variety of everyday and academic purposes. Students will make short classroom and school-wide presentations; read a variety of adapted and original texts in English; and write using a variety of forms of text. Students will also expand their academic vocabulary and their study skills to facilitate the transition to the mainstream school

program. This course also introduces students to the rights and responsibilities inherent in global citizenship, and to a variety of current Canadian issues.

Prerequisite: English as a Second Language - Level 2 or equivalent

EAL701D - English as a Second Language 3

This course prepares students to use English with increasing fluency and accuracy in classroom and social situations and to participate in Canadian society as informed global citizens. Students will develop the reading, writing, and oral presentation skills required for success in all school subjects. They will study and interpret a variety of grade-level texts; extend listening and speaking skills through participation in discussions and seminars; write narratives, articles, and summaries in English; and respond critically to various print and media texts.

Prerequisite: English as a Second Language - Level 3 or equivalent

Mathematics

MAT421A - Math 10

This is an introductory academic high school math course covering: basic trigonometry (solving triangles with sine, cosine and tangent), factors and products (squares and roots using prime factorization, factoring polynomials, distributive property applications), roots and powers (mixed and entire radicals, rational and negative exponents), relations and functions (representations and properties, interpreting and sketching graphs), linear functions (slope, parallel and perpendicular lines, forms of linear relationships), systems of linear equations in two variables (solve graphically, by substitution and elimination) and, as time permits, measurement (Imperial/metric conversions, surface area and volume of right pyramids, right cones and spheres).

MAT521A - Math 11

This is a second level academic math course covering the following topics: inductive and deductive reasoning (conjectures, validity, proofs), angle properties (parallel line relationships, triangle and polygon relationships), trigonometry (sine law, cosine law, ambiguous case), statistics (measures of central tendency, graphs, standard deviation, normal distribution, confidence), quadratic functions (properties, interpretation, graphing, solving roots) and systems of linear inequalities (graphing, interpreting and optimization).

Prerequisite: MAT421A

MAT621B - Precalculus

This is a third level academic math course covering: graphic transformations of six functions (linear, quadratic, cubic, radical, rational and absolute value), polynomial functions (properties, remainder and factor theorems, graphs, interpretation, solving

Virtutis • Fides • Scientia

GRACE CHRISTIAN SCHOOL
est. 1980

roots), exponential functions (properties, graphs, solving, applications), logarithmic functions (properties, graphs, solving, applications), unit circle and trigonometry (radian measure, arc/angle relationships, trigonometric ratios on the Cartesian plane, solving trigonometric equations, interpretation of graphs and equations of periodic functions) and combinatorics (factorials, permutations, combinations and Binomial Theorem).

Prerequisite: MAT521A

MAT621S – Precalculus AP

This is a third level academic math course covering: graphic transformations of six functions (linear, quadratic, cubic, radical, rational and absolute value), polynomial functions (properties, remainder and factor theorems, graphs, interpretation, solving roots), exponential functions (properties, graphs, solving, applications), logarithmic functions (properties, graphs, solving, applications), unit circle and trigonometry (radian measure, arc/angle relationships, trigonometric ratios on the Cartesian plane, solving trigonometric equations, interpretation of graphs and equations of periodic functions) and combinatorics (factorials, permutations, combinations and Binomial Theorem).

Prerequisite: MAT521A

MAT611S – Calculus AP

This is a third level academic math course covering: limits of functions, derivatives, and integration, all of which are combined with real-life applications.

Prerequisite: 90%+ average in MAT521A and in MAT621B/S

Virtutis • Fides • Scientia

GRACE CHRISTIAN SCHOOL
est. 1980

Science

CHM521A - Chemistry I

This is the first high school science course to deal exclusively with the exploration of chemistry. In this academic course, students will explore: the classification and states of matter; measurement and mathematical applications; atomic structure and the quantum model; the periodic table; chemical bonding; molecular structure; chemical composition and nomenclature; and chemical reactions.

CHM621A - Chemistry II

This academic course builds on the basics of Chemistry I to discuss: stoichiometry; the natures of solids, gases and liquids; intermolecular forces; solutions and calculating measures of concentration; thermodynamics and kinetics; chemical equilibria; acids, bases and salts; redox and electrochemical reactions; and, as time permits, introductions to organic chemistry and nuclear chemistry.

Prerequisite: Chemistry I

PHY521S - Physics I AP

This blended advanced placement academic course provides the quantitative and theoretical foundation of the following units: kinematics, dynamics, circular motion and gravitation, energy, momentum, harmonic motion, and torque.

PHY621S - Physics II AP

This blended advanced placement academic course focuses on fluids, thermodynamics, electric forces and fields, electric potential, electric circuits, magnetism and electromagnetic induction, optics, and quantum/atomic/nuclear physics. **Prerequisite: PHY521A**

BIO521A - Biology I

This introductory biology course presents life as God created it and controls it. Students will study the living world around them: the things they can see, touch and identify. The units of study include: botany, human physiology and anatomy, zoology, biomes, and life sciences.

BIO621A - Biology II

This is the second biology course offered in high school. It builds on the knowledge and skills obtained from Biology I and will provide students with the opportunity to increase their scientific literacy by continuing to develop foundational knowledge and skills and to make connections between the life sciences, technology, society, and the environment. In this hands-on, flipped model comprehensive Biology course students explore: molecular and cellular biology, ecology, bio-ethics, cloning, human physiology and anatomy, evolution vs. creation, the complexity of organisms, bio-diversity, taxonomy and forensic

Virtutis • Fides • Scientia

GRACE CHRISTIAN SCHOOL
est. 1980

science. This course intensively seeks to ask how the study of Biology conflicts with what we believe about our faith.

Social Studies

GEO421A - Canadian Geography

This course explores Canada's distinct and changing character, and the geographic systems and relationships that shape it. Students will investigate the interactions of natural and human systems within Canada, as well as Canada's economic, cultural, and environmental connections to other countries. Students will use a variety of geographic tools and technologies, inquiry, and communication methods to analyse and evaluate geographic issues, and to present their findings.

LAW521A - Law

The purpose of Law 11 is to allow students to understand that God is the originator of law and that modern law was constructed on a Biblical worldview of right and wrong behaviors. Students will utilize the text book All About Law which will be presented in units covering the nature of law and historical creation of Canada's legal system, the role of the Charter of Rights and Freedoms, constitutional and administrative law within the Canadian court system, criminal and civil law practices, and the role of family law in society. Students will create interactive notebooks based on readings and article presentations, analyze case law in various legal areas, work on project-based inquiry questions dealing with creation of constitutions and debates on current topics, visit both the Provincial and Supreme Courts on PEI, and participate in an end-of-year mock trial. Students will be evaluated using both written and oral presentations including critical analysis of media portraits of legal issues.

POL621A - Political Science

This is an inquiry-based course which utilizes a variety of teaching methodology in order to examine why God created government for mankind and how God has an order in the function and process of government in modern society. Students will use individual, shared and group activities to explore the themes of government: role of officials in Canadian local, provincial and national governments; use of political parties to represent diversity of opinion on role of government in citizens lives; creation of a multi-party electoral system; participation in both a model National Parliament and International United Nations. Students will read novels, articles, and online resources to meet learning objectives. Use of oral presentations of current events will be an important weekly component in addition to participation in online forums, in-class debates, and group project activities. Students will have both out-of-class observations and in-class visitors to present roles of government. Students will be strongly encouraged to participate in the Encounters Canada Democracy Week in Ottawa each March and in the annual PEI Rotary Youth Parliament.

Virtutis • Fides • Scientia

GRACE CHRISTIAN SCHOOL
est. 1980

ECO621A - Economics – Grade 12

This is an online, self-directed course which includes a practical entrepreneurship component in partnership with the Junior Achievement Student Venture program. Economics is the social science of decision-making of both macroeconomics and microeconomics. The goal of the course for students to see how God gives freedom of choice to both government and individuals in making wise choices with the resources God has entrusted to mankind. Junior Achievement Student Venture requires the creation, marketing and production of a student's good or service from September to April. Students will also complete an end-of-year research paper on a Canadian family business and its impact on Canada's economy. Course topics covered include: economic models, economic systems, role of government, microeconomics and the circular flow model, supply and demand, and types of business.

HIS521A - Ancient and Medieval History - Grade 10/11

This survey course in ancient and medieval history will use student-directed activities to trace the evolution and the principal events in human history. Emphasis will be placed on relating historical events and legacies to the present. Students will be expected to analyze major civilizations based on the attributes of civilization. The course follows a chronological path exploring the ancient civilizations of Mesopotamia and Egypt; the cultural achievements of the Greeks and the Romans; the rise of Christianity, Islam, and other religions; the history of the East; and the Feudal System.

HIS621A - Canadian History

Canadian History was developed as an online course to specifically represent an Atlantic Canadian perspective on our national historical narrative. The course is organized into thematic units which address persistent questions in Canada's history. This course emphasizes the importance of student inquiry and research using historiography and the historical method in the examination of Canada's history. Key topics studied through these approaches include, but are not limited to, First Nations, Colonialism, Confederation, World Wars, Free Trade, Constitutional Issues, Canada's Role in the Global Community, Industrialization, Human Rights Issues, and Immigration/Migration. Students will be encouraged to think critically about the historical narrative of Canada and to observe the impact that our history has on the state of our country today.

Virtutis · Fides · Scientia

GRACE CHRISTIAN SCHOOL
est. 1980

Christian Ethics

ETH421A - Christian Ethics I

This course is designed to help students understand why they are alive and God's amazing plan for them. Using the Bible and Rick Warren's book *The Purpose Driven Life* the year will be spent answering the question, "What on earth am I here for?" Students will gain a deeper understanding of who God is and how to develop a more meaningful relationship with Him. Scripture reading and memorization, along with reading of Christian Living Books and the Bible are also part of the course.

ETH421A - Christian Ethics II

This course focuses on the personal development of a Christian Worldview. Let God Be God is a study of the nature and character of God. It is based on the premise that the more we know and understand God through a careful study of His Word, the greater will be our personal challenge to maintain a deep relationship with him. Scripture memorization, the reading of Christian Living Books and the Bible are also part of this course.

ETH421A - ESL Christian Ethics I

This English as a Second Language course introduces students who have never studied the Bible to new vocabulary, ideologies, and the person of Jesus Christ. Students will gain a deeper understanding of the Christian faith as they study the life, ministry, and grace of Jesus Christ. Vocabulary testing, scripture memorization, the reading of Christian Living Books, group projects, oral presentations and Bible studies are also part of this course.

ETH521A - ESL Christian Ethics II

This English as a Second Language course introduces students who have never studied the Bible to new vocabulary, ideologies, and the intentional study of the New Testament. Students will gain a deeper understanding of the Christian faith as they study the life, ministry, and grace of Jesus Christ and his impact on the early Christian church. Vocabulary testing, scripture memorization, the reading of Christian Living Books, group projects, oral presentations, interviews with Christians, and Bible studies are also part of this course.

PHL621A - Worldviews

This course will introduce students to a comparative worldviews course which focuses on the exploration of Christianity in comparison to Islam, Secular Humanism, Marxist-Leninism, Cosmic Humanism and Post-modernist illustrated in modern-world interactions. Students will be equipped apologetically to understand how their worldview is created and based on their view of reality and how other worldviews compete with Christianity for dominance in society and cultural norms. Students will explore each of

Virtutis • Fides • Scientia

GRACE CHRISTIAN SCHOOL
est. 1980

the six major worldviews present in twenty-first century thinking in light of theology, philosophy, ethics, biology, psychology, sociology and law. Students will engage with visual, oral and written sources of information to think critically about defending their worldview and logically evaluation competing worldviews presented in today's culture. Both historical and contemporary topics will be debated and discussed in both group and class discussion to provide young people with a framework to defend their Christian beliefs in a hostile intellectual and cultural environment. Students who do not possess a Christian worldview will be given opportunity to logically examine the claims of their worldview to test its rationality and aims to influence their view of God, the world and themselves. Students will also memorize Scripture and perform community service each quarter as part of course expectations and evaluated outcomes.

FAM621A - Family Life

This course will allow students to explore interpersonal relationships within a Biblical worldview framework. The uniqueness of each individual made in the image of God as either male or female will be emphasized within a comparison analysis to prevalent secular worldviews of gender identification and fluidity. Students will synthesize the Christian principles of accepting and loving themselves as God made them with their own personality characteristics and level of development toward adulthood. The goal of self-development will be given a Biblical context of maturity and self-reliance which still dependent on God's guidance and community mentorship. Students will learn how to relate to the opposite sex before, during and after a dating/counting relationship. Students will see that there is reward in seeking to maintain joy in either a single life of service for God or a long and healthy marriage relationship with the possible blessing of children. Using a variety of methods, students will read and reflect on Biblical and Christian Living sources including a group project focused on the book Cracking the Communication Code between men and women. Scripture memorization, community service and interactive notebooks will be important assessment components to the curriculum.

Creativity

ART401A - Art I

This course provides a study of basic art skills such as drawing. The focus of the class is to develop drawing skills based on the elements of art using a variety of media including charcoal, ink and pencils. Students are exposed to art throughout history and will learn to critically view and discuss the visual images they view and create. Students are required to create, collect, record, practice, and reflect in their journal and sketchbook on a regular basis. Students will produce quality art and tasteful presentations. Students are expected to purchase their own supplies. This course develops the learner's eye to see more of what our Sovereign Creator has made for us to enjoy.

Virtutis • Fides • Scientia

GRACE CHRISTIAN SCHOOL
est. 1980

ART521A - Art II

This course builds upon the knowledge, skills, ideas, and experiences introduced in ART401A. There is an emphasis on painting and developing an understanding of colour theory creating projects using watercolour and acrylic paint. The main focus of the course is to develop originality in composition through applying a working knowledge of the elements and principles of art, design, and spatial understanding. Students will learn to critically view and discuss their own compositions while learning to use appropriate vocabulary to examine art throughout history. Students will continue to create, collect, record, explore, and reflect in their sketchbook on a regular basis. Students will produce quality art and tasteful presentations. Students are expected to purchase their own supplies. This course emphasizes the beauty in nature that reflects our Sovereign Creator in the world around us.

Prerequisite: ART401A or permission from the teacher (based on level of skill and knowledge)

ART511S - Art Drawing AP

This course delineates overarching understandings central to the study and practice of art and design. The framework for the AP Art and Design courses is made up of three big ideas:

Big Idea 1: Investigate materials, processes, and ideas.

Big Idea 2: Make art and design.

Big Idea 3: Present art and design.

Prerequisite: ART401A or permission from the teacher (based on level of skill and knowledge)

ART621A - Art III

This course will allow students to explore a variety of techniques using clay. Projects will be glazed and fired in the kiln on site. Students will develop skills based on the art elements of texture, form and design while handbuilding and working with clay on the pottery wheel. Students will learn to critically view and discuss their own compositions while learning to use appropriate vocabulary to examine art throughout history. Students will continue to create, collect, record, explore, and reflect in their sketchbook on a regular basis. Students will produce quality art and tasteful presentations. Students are expected to purchase their own supplies. This course provides an understanding of shape and form that our Sovereign Creator designed from the beginning of time.

Prerequisite: ART401A, ART521A, ART511B, or permission from the teacher (based on level of skill and knowledge)

MUS621A - Music

This course is designed for the student who has an interest in music. Students will examine music in their lives, its role in culture and the ways that it is experienced. This

Virtutis · Fides · Scientia

GRACE CHRISTIAN SCHOOL
est. 1980

course will refine and build upon musical concepts, knowledge, and skills students have already acquired that enable students to consider and discuss repertoire using the language of music. Students are expected to be an independent part of an instrumental and/or vocal ensemble. The goal of the course is to teach students about who God is through music, to develop their skills as musicians, to enhance worship in their own lives and to cultivate an appreciation for music.

DRA701A - Drama

This course will focus on methods of acting and the technical aspects of theatre productions. Students will develop their skills in movement, improvisation, character development, voice usage, and ensemble performances through a variety of activities. In both small and large groups, students will perform a variety of scenes, working collaboratively to create or develop scene where they will explore how to communicate ideas, experiences, and feelings in a range of dramatic forms. Additionally, students will develop skills in the technical areas of theater as they work together on a class production. **Acceptance to course potentially based on auditions.**

CMP521A - Computer Studies

This is an introductory Computer Science course. It is an academic level course designed to give students an understanding of the computer and its effect upon society. The focus of this course is to develop problem solving skills with various software applications and programming and addresses the following computer areas: history of computers, computer hardware, software programming, microprocessor programming, and introductory robotics.

ROB621A- Robotics

Robotics is composed of technical learning opportunities as well as the scientific knowledge, skills, and technological/societal connections through an automated and radio-controlled robotics design context. This course includes the introduction of automation (computer programming) into the engineering design process along with a greater emphasis on synthesis through open-ended project-based design challenges.

Limited enrollment – approval by instructor. Prerequisite: CMP521A

WRT521A - Creative Writing

This is a comprehensive course in writing which exposes students to various writing styles and gives them practice in using them. News reporting, persuasive writing in the form of editorials, the creation of resumes and cover letters, as well as the opportunity to use various literary techniques in narrative writings are offered. Students have opportunity to partake in the development of a complete work from its first idea to its final publication.

Electives

ISC621A - Independent Study

This course will allow students the unique opportunity to explore an academic problem, topic, issue, or idea of interest within the discipline of their choice. Throughout the course, students will explore, design, plan and conduct a year-long research or product-based investigation. Each week, students will work with an instructor to facilitate their learning. Students will have the opportunity to showcase their ability to produce excellent results while working independently. All student skill development, process, and work will be curated in an online portfolio. The course culminates in a literary review and final product and/or presentation accompanied by an oral defense.

Limited enrollment – approval by instructor.

ACC621A - Accounting Principles

Accounting Principles is an introductory course that includes concepts, procedures, and applications. It is designed for students who plan to take advanced accounting courses at the college or university level. This course will have entrance recognition at Holland College with the curriculum designed to link to post secondary opportunities in the study of Accounting and Business. This course includes the eight steps of the accounting cycle, subsidiary ledger accounting, accounting for a merchandising business & specialized journals. **Offered select years.**

PED401A - Physical Education and Wellness

The purpose of PED401A is to develop confident and competent students who understand, appreciate, and engage in a balanced, healthy, and active lifestyle. Throughout PED401A, opportunities are provided for students to attain and maintain a healthy mind, body, and spirit. This course will broaden, extend, and reach beyond traditional ideas of fitness and health.

CEO401A - Career Explorations and Opportunities

This is a course which enables students to develop the skills they need to become self-directed individuals who set goals, make thoughtful decisions, and take responsibility for pursuing their goals throughout life. Students will explore a wide range of post-secondary education and career options, think critically about health issues and decisions, develop financial literacy skills related to pursuing their education and career goals, and begin planning for their transition beyond secondary school. The course provides relevant and experiential learning opportunities, helping students relate their learning in school to the demands of the working world and the expectations of society.

CWS501A/601A - Cooperative Education

Cooperative Education is an experiential method of learning that formally integrates classroom studies with learning through productive work experiences in a field related to

a student's academic or career goals. It provides progressive experiences in integrating theory and practice. Each cooperative education course is a partnership among students, schools, and the community, with specified responsibilities for each. Each course consists of a classroom component and a placement component. Prior to the placement, all students must demonstrate an understanding of the pre- placement orientation expectations and participate in the development and implementation of their personalized placement learning plans. These plans outline the specific goals the students, teachers, and employers have regarding opportunities to apply and extend knowledge and practice and refine skills to demonstrate student achievement of placement expectations that reflect current workplace practices and standards.

HPT421A/HPT521A/HPT621A - High Performance Training

This academic-credited course will train student-athletes to increase their speed, power, strength, and flexibility on-site at Andrews Sports Institute – for GCS athletics, local sports, and for an overall healthy lifestyle – while also allowing students to earn up to three high school credits. This course includes 100 hours of individual and group training on-site at Andrew's Sports Institute throughout the school year and allows for implementation of goal-setting skills, leadership development, and specific sport-focused or general training. It provides athlete focus on power, speed, agility, flexibility, and strength, as well as healthy habits and injury prevention education, creation of emotional and mental balance between sport and life, and growth in self-confidence.

Prerequisite: Limited enrollment - acceptance based on application and current athletic commitment (school and/or community)

External Credit (Duke of Edinburgh, Royal Conservatory of Music, Canadian Cadets, Sport PEI, Shad, 4H, Dance Umbrella, Army/Naval Reserves, Skills Canada, Island Dance Academy, College of Piping, InSTEM, etc)

External credential courses will acknowledge the value of student learning outside the school system by recognizing, for high school credit, credentials obtained outside of regular school instructional time by an education service agency external to the public school system. External high school credit will be awarded for courses, programs, or assessments that have been evaluated and that match or exceed provincial high school standards. External credentials must contribute to the Essential Graduation Learnings, and must meet the standards defined in Minister's Directive MD 11-01 (https://www.princeedwardisland.ca/sites/default/files/publications/eelc_external_credentials_policy.pdf). External credentials will be reflected on the student's high school transcript, thereby enhancing the transcript for the student.
